

SWATI NANDI

SOFTWARE ENTHUSIAST

Hangal, Haveri | nandiswati697@gmail.com | Swati Nandi

Curious and driven Computer Science student with knowledge in Machine Learning and Web Development. Experienced in applying ML techniques for predictive modeling, data analysis, and intelligent system design. Skilled in building databases, implementing object-oriented solutions in Java, and creating dynamic web applications. Enthusiastic about full-stack development and passionate about integrating AI-driven approaches into real-world projects to deliver impactful and innovative solutions.

EDUCATION

Bachelor of Engineering – Computer Science Engineer (3rd Year)

KLE Dr. M. S. Sheshagiri College of Engineering and Technology, Belgaum

Pre-University – PCMB (2023)

St. Joseph's Composite PU College, Vijayapura

SSLC – (2021)

St Anne's ICSE School, Haveri

EXPERTISE SKILLS

- Frontend and Backend Development
- Database Management
- Java
- C Programming
- C++
- HTML and CSS
- Full stack web development
- SQL

MINI PROJECTS

• ADHD Prediction using Machine Learning | WiDS Datathon 2025

Built models to predict ADHD diagnosis from demographic, behavioral, and fMRI data. Achieved 78.6% accuracy using Histogram-Based Gradient Boosting, the best among evaluated models.

Key Learnings: Data preprocessing, feature engineering, ensemble methods, model evaluation, and handling high-dimensional healthcare data.

• Waste Management & Recycling Automation

Built an AI-based system for smart waste collection and recycling using CNN for waste classification and Dijkstra's algorithm for route optimization.

Key Learnings: Applied machine learning, graph algorithms, and automation techniques to solve real-world sustainability challenges

- **Crime Investigation Database (SQL Project):**

Designed and implemented a normalized SQL database for managing crime investigation data including cases, suspects, victims, evidence, officers, and witnesses. Built clear entity relationships (One-to-Many, One-to-One) to mirror real-world investigation workflows, ensured data consistency, and enabled efficient querying for case tracking and reporting.

Key Skills: SQL, ER modeling, database normalization, relational schema design, query optimization.

- **Portfolios:**

Developed Multiple Portfolios for classroom activities as well as other projects.

2. Waste Management System (<https://swatinandi.github.io/Waste-Management-System.github.iohub/>)
3. COA Portfolio (https://sites.google.com/d/1Rhu1IHctz2zL-Hv8yKKwiBEFnX9wZGn8/p/1lVY8wPeU2_g4AoitNzeq03NoC9GH8OrK/edit)

- **Online web app:**

A simple online web app being developed by me (still in progress) using VS Code and Node JS including frontend and backend stored in MongoDB database. Deployed it online using Render through my Github repository.

COURSES AND CERIFICATES

- AIMA for Geodata Analysis - **ISRO**
- Javascript Bootcamp - **Lets Upgrade**
- Python Bootcamp - **Lets Upgrade**
- Cyber Security and Ethical Hacking Bootcamp - **Lets Upgrade**
- IELTS Prep-Basic Series - **Lets Upgrade**

INTERESTS

- Reading Books
- Singing
- Travel
- Programming

LANGUAGES

- English
- Hindi
- Kannada

OTHER SKILLS

- Communication Skills
- Team Management
- Interpersonal Skills
